 - *for information about other ABS statistics and services please refer to the back page of this publication.*
-

PREFACE

This publication presents a summary of the latest available statistics, at the time of preparation, for the separate Statistical Local Areas of the ACT.

Table 1 contains data that is only available at the statistical Subdivision level. The Statistical Subdivisions of the ACT equate with the towncentre districts.

Tables 2 to 8 contain Statistical Local Area data arranged alphabetically for each of the subdivisions of Canberra. The Statistical Local Areas (SLAs) equate to suburbs in the ACT. A map, indicating the area of the Canberra Statistical Division each subdivision comprises, precedes the data.

Page 2 shows a map of and key to all the SLAs of the ACT.

The data contained in this publication represents only a sample of the full range of statistics available from the ABS. For further information about ABS statistics and services refer to the back cover of this publication.

MAIN FEATURES – TABLE 1

Table 1, ACT Statistical Subdivisions, has been expanded in this issue of *Canberra Statistical Area Summary* with the introduction of tourist accommodation data for Holiday flats and units and Caravan parks. Another change to Table 1 is the replacement of the ASIC divisions with the new ANZSIC divisions for Business Register counts of location.

Some of the main features from Table 1 in this issue the Area Summary were:

- * There were 10,755 businesses in the ACT on the ABS Business Register in March 1994.
- * With the exception of the Agriculture, forestry, fishing and hunting and Construction the Canberra Central subdivision recorded the greatest number of businesses on the ABS Business Register for the ACT in March 1994 .
- * The Property and business services sector reported the greatest number of businesses on the ABS Business register in March 1994 with 2,190. Retail trade (1,954), Construction (1,119) and Health and community services (1,025) were the other main businesses on the Register at this point in time.
- * Takings from all forms of tourist accommodation in the ACT over the 1993-94 financial year were \$83.1 million. Hotels, motels and guest houses with facilities were the major revenue raiser with \$69.6 million followed by Holiday flats and units (\$10.6 million) and Caravan parks (\$2.9 million).
- * Average room and unit occupancy rates for Hotels motels and guest houses and Holiday flats and units were similar with occupancy rates of 64.2% and 66.9% respectively.
- * There were 178,244 motor vehicles on register in the ACT in September 1993, an increase of 10.9 per cent since the 1991 Motor Vehicle Census.
- * Belconnen SSD had the greatest number of vehicles on the motor vehicle register with 45,681, Tuggeranong and Canberra Central followed with 37,939 and 35,210 vehicles respectively.
- * The 1991-92 Retail Census recorded turnover in the ACT in 1991-92 at \$1,793 million, an increase of 22.2 per cent from the last census in 1985-86. Canberra Central continues to be the main retail area accounting for over 41 per cent of the total turnover.
- * Employment data collected in the 1991-92 Retail Census showed increases in employment for both sexes, with female employment increasing by 54.2 per cent and male employment by 4.3 per cent from the previous Retail Census in 1985-86.

Statistical Divisions and Subdivisions Australian Capital Territory as at 1 January 1991

(a) Includes Fyshwick. (b) Includes Hume and Mitchell. (c) As at June 1994. (d) Data coded according to postcode. Thus Canberra Central includes Harman, Majura, Pialligo and Symonston. Weston Creek includes Mitchell, Stromlo and Uriarra. Outer Canberra includes some rural areas. Vehicles that are registered in the ACT by persons not living in the ACT are included in ACT Balance. (e) Total includes unknowns not classified elsewhere. (f) Total includes Jervis Bay.

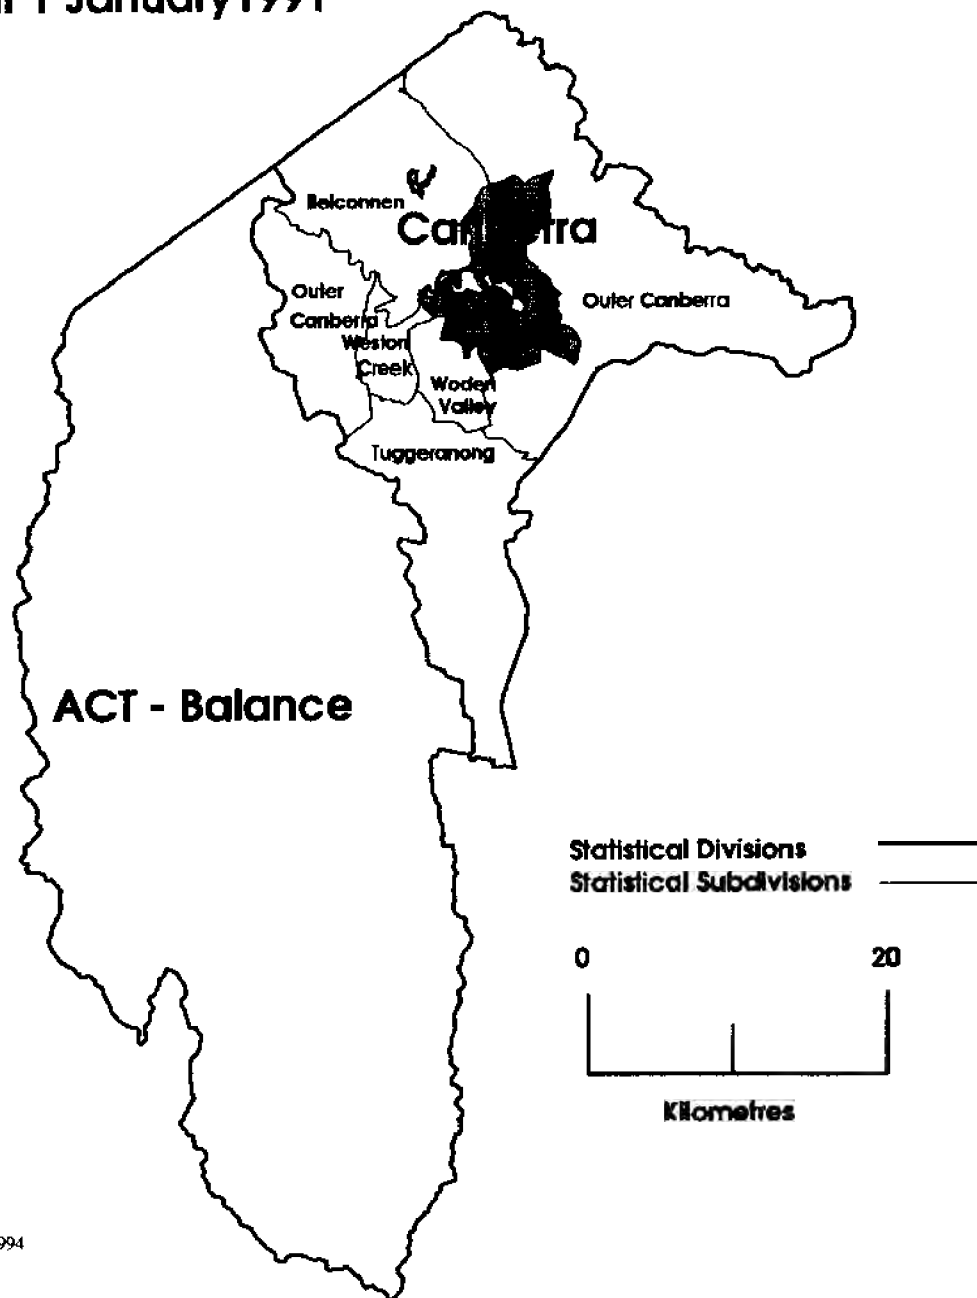

MAIN FEATURES – TABLES 2 – 8

Tables 2-8 of the 1994 Canberra Statistical Area Summary include some data not published in previous issues, i.e. a detailed age breakdown of the estimated resident population for each suburb in 1993 (the latest data available since the 1991 Census) as well as data for the relatively new suburb of Palmerston in the Outer Canberra statistical subdivision.

Some of the main features from these Tables in this issue of the Area Summary were:

- * The population of the ACT increased by 4,585 (or 1.6%) between 1992 and 1993 to reach 298,303. With a physical area of 2,367.46 sq km the population density of the ACT now stands at around 126 persons per square kilometre up from 124 persons per square kilometre in 1992.
- * The split of males and females in the ACT is almost even with 50.2 per cent of the population being male and the remaining 49.7 per cent, female. Canberra Central and Belconnen were the only two towncentre districts where the number of females exceeded the number of males.
- * Tuggeranong continues to lead the way with the greatest percentage of the population aged 0-4 years with 40.8 per cent. Belconnen and Canberra Central followed with 27.2 per cent and 14.4 per cent respectively. In terms of the population aged 65 years and over Canberra Central accounted for 42.9 per cent of people in this age group, followed by Belconnen (21.1%) and Woden Valley (16.5%).
- * There were 3,547 more births than deaths in the ACT in 1992-93. Infant deaths showed a decline of 27 per cent from 37 in 1991-92 to 27 in 1992-93.
- * Tuggeranong and Outer Canberra combined accounted for over 60 per cent of the total number of dwelling units created in the ACT in 1993-94. In terms of the value of building approvals granted, however, Canberra Central recorded the greatest figure (\$2.6 million), followed by Tuggeranong (\$1.8 million) and Outer Canberra (\$1.2 million).
- * The number of persons killed on ACT roads fell by 40 per cent in 1993 from the figure reported in 1992. The number of injuries requiring hospitalisation as a result of road traffic accidents also fell, with the 1993 figure 25.9 per cent lower than that of 1992.
- * There were 63,170 people attending schools in the ACT as at February 1994. Over 66 per cent of students attended government schools.

Statistical Divisions and Subdivisions Australian Capital Territory as at 1 January 1991

CANBERRA CENTRAL STATISTICAL SUBDIVISION - MAIN FEATURES

The overall density of the population in the Canberra Central Statistical Subdivision (SSD) continues to decline with ten of the twenty-five suburbs showing declines in the estimates of the resident population in 1993.

The number of births in Canberra Central SSD during 1992-93 increased by 0.9 per cent compared with the preceding year. Female births exceeded male births by 3.2 per cent while male deaths exceeded female deaths by 17.9 per cent in the period.

Canberra Central SSD reported the greatest contribution of all the SSDs to the value of building approvals in the ACT throughout 1992-93. The major suburbs recording activity were Barton (\$95.0 million) and City (\$35.1 million). Narrabundah (\$18.2 million), Acton (\$16.6 million), Griffith (\$16.1 million) and Deakin (\$16.0 million) also showed significant building activity in 1992-93.

Sixty six per cent of the special schools operating in the ACT in 1994 were physically located in the Canberra Central SSD. These schools accounted for almost seventy per cent of the 423 students who attended special schools.

Statistical Divisions and Subdivisions Australian Capital Territory as at 1 January 1991

© Commonwealth of Australia 1994

BELCONNEN STATISTICAL SUBDIVISION - MAIN FEATURES

With 9,044 or 35.2 per cent of the ACT population, the Belconnen statistical subdivision (SSD) had the greatest proportion of 15-19 year olds in 1993. Kaleen and Evatt lead the way with 815 and 639 people respectively in this age group in 1993.

Aranda was the only suburb in the Belconnen SSD to show an excess of deaths over births in 1992-93 with 36 deaths and 25 births in the period. Overall for the SSD there were 1,232 births and 237 deaths in 1992-93, producing a natural increase of 995 persons in the year.

In 1993-94 there were 486 approvals to build granted in the Belconnen SSD. Approvals were granted in all suburbs, with Kaleen (56 approvals), Evatt (38) and Melba (36) leading the way. Florey (28), Weetangera (also 28), Belconnen town centre (26), Aranda and Bruce (both 25) also showed reasonable levels of proposed activity for the SSD in the year.

Belconnen SSD accounted for 31.6 per cent of all government schools and 19.5 per cent of all non-government schools in the ACT in 1994. Kaleen has the greatest number of schools of any of the suburbs in the Belconnen SSD with 4, however Charnwood, Evatt, Florey, Hawker, Holt and Melba all have 3 schools each. In total there were 39 schools in the Belconnen SSD in 1994.

WODEN VALLEY STATISTICAL SUBDIVISION - MAIN FEATURES

Only three of the twelve suburbs making up the Woden Valley Statistical Subdivision (SSD) showed an increase in the population between 1992 and 1993. O'Malley showed the strongest growth with an increase of 10.6 per cent, followed by Isaacs (2.3%) and Pearce (0.2%). Overall the population of the SSD fell by 0.7 per cent in the year.

With the exception of Hughes and Lyons, more males than females were born in all suburbs in the Woden Valley SSD in 1992-93. Overall male births represented 52.7 per cent of all births in the SSD in the period.

Almost seventy per cent of the value of building approvals granted in the Woden Valley SSD were for Garran and Phillip. Overall the value of building approvals for the SSD increased by 31.2 per cent from 1992-93 to 1993-94.

Of the 6,346 students attending schools in the Woden Valley SSD just over 50 per cent (3,421) attended schools in Pearce and Garran, a further 22 per cent of students attending schools in the SSD attended schools in Phillip and Curtin.

WESTON CREEK STATISTICAL SUBDIVISION - MAIN FEATURES

Rivett (2,310.5 persons per sq kilometre) and Fisher (2,212.2 persons per sq kilometre) were the two most densely populated suburbs in the ACT in 1993 and both form part of the Weston Creek Statistical Subdivision (SSD). Overall Weston Creek SSD was the second most densely populated subdivision in the ACT, after Woden Valley.

In all suburbs in the Weston Creek SSD the number of births either exceeded or equalled the number of deaths in 1992-93. The greatest differences occurred in Duffy (45 more births than deaths) and Rivett (42 more births than deaths). Weston was the only suburb to show the same number of births and deaths throughout the year.

The number of dwelling units created in the Weston Creek SSD doubled in 1993-94 from the previous year. Fisher (25), Duffy (23) and Stirling accounted for 90.8 per cent of all the dwelling units created in the Weston Creek SSD in the period.

Sixty-four per cent of students living in the Weston Creek SSD attended government schools in 1994. As a proportion of the total number of students living in each suburb in the Weston Creek SSD, Rivett had the greatest number of government school students (74.5%) followed by Weston (70.5%), Duffy (69.4%) and Waramanga (68.2%).

Statistical Divisions and Subdivisions Australian Capital Territory as at 1 January 1991

© Commonwealth of Australia 1994

TUGGERANONG STATISTICAL SUBDIVISION - MAIN FEATURES

Over 30 per cent of the population of the Tuggeranong statistical subdivision were aged 14 years or less in June 1993. In contrast there was less than 3 per cent aged 65 years and over for the same period.

Continuing the trend of the previous year the Tuggeranong SSD reported the greatest number of births in the ACT in 1992-93. Kambah recorded the most births with 274 followed by Calwell (198), Theodore (145) and Isabella Plains (139).

Building activity in the Tuggeranong SSD continues to remain strong with over 35 per cent of all dwelling units created in the ACT in 1993-94 being in the Tuggeranong SSD. With 457 units created in the period Gordon was followed by Conder (306), Banks (240) and Bonython (222). These four suburbs combined account for 84 per cent of the total number of dwelling units created in the Tuggeranong SSD.

Over one third of all school students in the ACT live in the Tuggeranong SSD, with similar proportions of students in the subdivision attending government and non-government schools.

OUTER CANBERRA STATISTICAL SUBDIVISION - MAIN FEATURES

With the development of the new suburbs in the Outer Canberra statistical subdivision the population density has increased over the past twelve months from 6.4 persons per square kilometre in 1992 to 12.8 in 1993. Palmerston is the most densely populated suburb with 1,333.5 persons per square kilometre and the Balance of Gungahlin the least dense with less than one person per square kilometre on average.

There were 69 births in the Outer Canberra SSD in 1992-93, almost forty per cent of whom were born in the Gungahlin Balance statistical local area. With only 6 deaths in the SSD in the period the natural increase in the population was 63 persons.

The value of total building approvals in the Outer Canberra SSD was \$117.2 million. The balance of Gungahlin and Palmerston were the two major contributors with \$76.3 million and \$32.8 million worth of building approvals granted respectively.

The number of school students living in the Outer Canberra SSD has increased significantly with an increase of 216 students (or 54%) between July 1992 and July 1993. Pre school enrolments remained relatively stable, with total

ACT BALANCE STATISTICAL SUBDIVISION - MAIN FEATURES

The estimated resident population of the ACT Balance SSD remained unchanged in 1993 from the previous year. The SSD has a density of around 1 person for every 4km making it the least dense SSD in the ACT.

There were 11 births in the ACT Balance SSD in 1992-93 compared with 3 in 1991-92. The number of deaths was similar for both years with 3 in 1992-93 and 2 in 1991-92. There were no infant deaths reported in the SSD in 1992-93.

Building activity in the ACT Balance SSD was relatively subdued in 1993-94 with only 3 approvals granted at a value of \$328 000. There were no dwelling units created in the period.

School student numbers in the Outer Canberra SSD remained basically unchanged from the previous year and accounted for 0.2 per cent of all school students in the ACT in February 1994.

FOOTNOTES

- (a) Source: 1991 Census of Population and Housing
- (b) Excludes rural areas.
- (c) These figures are final data from the 1991 Census.
- (d) Not calculated due to new suburb or small size of initial population.
- (e) Includes occupied private dwellings, unoccupied private dwellings and occupied non-private dwellings (hotels, hospitals, etc).
- (f) Average annual rate of change is calculated using annual percentage changes from 1991 to 1993 inclusive. Caution should be used in the interpretation of these figures.
- (g) Includes 2 overseas births.
- (h) Includes 2 overseas births.
- (i) Includes 2 deaths with undefined ACT location.
- (j) Includes 2 deaths with undefined ACT location.
- (k) Excess of births over deaths.
- (l) Source: Department of Employment, Education and Training. Care should be exercised in the interpretation of these figures, especially those SLAs which have labour forces less than 2000 persons.
- (m) Separate figures for Palmerston unavailable. Balance of Gungahlin includes Palmerston.
- (n) Source: Department of Urban Services.
- (o) Source: February 1993 ACT Public Preschool Census, ACT Department of Education and Training.
- (q) Source: Data File on ACT School Systems, February Update 1994, ACT Department of Education and Training. Figures for ACT Balance include Fairbairn and students not elsewhere classified.

To avoid confusion, the letter 'p' has been excluded from the list of footnotes as it is used by the ABS to denote 'preliminary' figures.

EXPLANATORY NOTES

STATISTICAL AREAS OF ACT

Statistical areas of the ACT are classified as follows:

- (a) *Statistical local areas* (SLAs) are the smallest types of spatial units in the Australian Standard Geographical Classification (ASGC) for which data shown in this publication are presented. They correspond in the majority of the cases to the suburbs of Canberra.
- (b) *Statistical Subdivisions* (SSDs). These consist of one or more SLAs and form the intermediate size spatial unit for the presentation of regional data.

DEFINITION OF TERMS USED

2. **Building Statistics.** The statistics were compiled on the basis of returns collected from builders and other individuals and organisations engaged in building activity. The survey consists of two components:

- (a) A sample survey of private sector jobs involving new house construction or alterations and additions valued at \$10,000 or more to houses;
- (b) A complete enumeration of jobs involving construction of new residential buildings other than private sector houses, all alterations and additions to residential buildings (other than private sector houses) with an approval value of \$10,000 or more, and all non-residential building jobs with an approval value of \$50,000 or more.

3. A *building* is defined as a rigid, fixed and permanent structure which has a roof. Its intended purpose is primarily to house people, plant, machinery, vehicles, goods or livestock. An integral feature of a building's design, to satisfy its intended use, is the provision of regular access by persons.

4. A *dwelling unit* is defined as a self-contained suite of rooms, including cooking and bathing facilities and intended for *long-term* residential use. Units (whether self-contained or not) within buildings offering institutional care, such as hospitals, or temporary accommodation such as motels, hostels and holiday apartments, are not defined as dwelling units. The value of units of this type is included in the appropriate category of non-residential building.

5. **ABS Business Register.** This information has been extracted from the ABS Business Register. The prime purpose of the Register is to provide a comprehensive source of business names and addresses from which selections can be made for inclusion in ABS economic censuses and surveys. The businesses on the Register are classified according to their industry and employment size. It is therefore possible to use the Register to derive statistical information.

6. The term *business* is used in a wide sense to include companies, sole proprietorships, partnerships, professional services, community services, government agencies and departments, religious bodies, etc. However, the ABS Business Register only includes those businesses that employ **wage and salary earners** and so businesses operated **entirely** by sole proprietors, partners and unpaid family members are excluded from this data.

7. In the case of businesses involved in agriculture, however, the ABS Business Register includes all those that have agricultural operations with an estimated value in excess of \$5,000 regardless of whether they employ wage and salary earners.

8. The information most readily available from the ABS Business Register is counts of business units (either management units or locations) classified by industry, geographic area and employment size although counts can be classified by other data items as well. Unlike most other ABS data sources, the ABS Business Register does not produce a regular publication showing information at a detailed level. However, *Profiles of Australian Business, 1992* (Catalogue no. 1322.0) shows the type of information that can be produced, at a broad level, from the Register.

9. If you would like to use ABS Business Register data, please contact Information Services in any ABS Office, or, alternatively, phone the ABS Business Register Section directly on (06) 252 5911.

10. **Census.** This publication contains final data from the 1991 Census of Population and Housing. The counts are on a place-of-enumeration basis, which provides a count of people by their location on census night, 6 August 1991, which may not be where they usually live.

11. The purpose of the census was to count every person who spent census night in Australia. This included people in private dwellings, occupied non-private dwellings, camping out, on vessels in or between Australian ports and on board overnight transport. Diplomatic personnel and their families were excluded from the census, as were diplomatic residences.

12. Adjustments are randomly made to information obtained from the Census to protect the confidentiality of information about individuals. As a result, component cells may not add to their totals. These differences are statistically insignificant and do not impair the usefulness of the data.

13. *Dwellings* are classified as either private or non-private. Private dwellings are either occupied or unoccupied, and are further defined by structure (for example, separate house, townhouse, etc). Non-private dwellings include motels, gaols, welfare institutions, hospitals, retirement villages, boarding schools, etc. The total dwelling count includes private dwellings (occupied or unoccupied) and occupied non-private dwellings.

14. The publication series *Census Counts for Small Areas* (Catalogue no. 2730.1-8) include final 1991 Census data and 1986 Census data for each statistical local area. These data have been adjusted to allow for boundary changes which have taken place between the 1986 and 1991 Censuses.

15. **Estimated Resident Population** is the official population estimates series compiled according to the place of usual residence of the population.

16. The estimates of total persons in each statistical local area at 30 June 1993 are derived from estimates of the number of occupied dwellings and their occupancy ratios. For each suburb the number of occupied private dwellings is estimated by using domestic electricity connections and enumerations of the number of occupied dwellings supplied by A.C.T. Administration. Historical housing occupancy trends derived from census counts are used to estimate occupancy rates for dwellings. These are applied to the number of occupied private dwellings to give an estimated population for each suburb. Births and student numbers are also used as indicators of population size.

17. **Tourist accommodation establishments** include establishments provide predominantly short-term accommodation (i.e. for periods of less than two months) to the general public, including:

- (a) *Hotels, motels and guest houses, with facilities* being establishments which provide a bath (or shower) and toilet in most guest rooms and have breakfast available for guests.
- (b) *Holiday flats and units* which are self-contained in terms of cooking, bath (or shower) and toilet facilities and do not have breakfast available for their guests; and
- (c) *Caravan parks* (short-term and long-term) available to the general public which have powered sites for caravans and toilet, shower and laundry facilities for guests.

18. The number of establishments and their capacity in the 1993-94 financial year relate to establishments which operated at any time during this period or which were temporarily closed for seasonal reasons. The room and bed occupancy rates and takings from accommodation relate to establishments which operated at any time during 1993-94.

19. Hotels, motels and guest houses and caravan parks within the scope of the survey which operated for any part of the survey period, or which closed temporarily for seasonal reasons were counted in the *number of establishments*.

20. For holiday flats and units, the number of owners, managers or real estate agents within the scope of the survey who operated for any part of the survey period were included in the *number of letting entities*.

21. Capacity in terms of *Guest rooms, Bed spaces, Holiday units or Caravan park sites, etc* is the maximum number available to accommodate paying guests during the survey period. Capacity closed temporarily for seasonal reasons is included.

22. *Bed spaces*. Three-quarter beds are counted as one bed space; double beds as two bed spaces. Cots are excluded.

23. Occupancy rates represent occupancy expressed as a percentage of total capacity available during the survey period. - e.g

Room occupancy rate (%) for the period =

$$\frac{\text{Room nights occupied}}{(\text{Guest rooms}) \times (\text{No. days in the period})} \times 100$$

24. *Takings from accommodation* refers to the revenue received from the provision of accommodation. Takings from meals are excluded.

25. **Labour Market Estimates**. The information on unemployment rates contained in this publication was produced by the Department of Employment, Education and Training (DEET).

26. The ABS does not publish unemployment data from the monthly labour force surveys for areas below Labour Force Dissemination Region because of high sampling errors at this level of disaggregation. More accurate estimates for small labour markets, namely Local Government Areas (LGAs), or SLAs where appropriate, can be obtained by combining the information on unemployment beneficiaries (UB) from the Department of Social Security (DSS), which are not subject to sampling errors and are available at postcode level, and the labour force estimates at Labour Force Dissemination Region level.

27. DEET has implemented a procedure for deriving small area unemployment estimates, based on the Structure Preserving Estimation (SPREE) methodology. This procedure involves the following steps:

- (a) The DSS data at postcode level are used to derive the number of beneficiaries in each LGA/SLA using postcode conversion weights.
- (b) As the number of beneficiaries is generally lower than the number of unemployed persons, the SPREE procedure adjusts the UB numbers in each LGA/SLA to ensure that the total at Labour Force Dissemination Region level (by sex, marital status and age) is the same as from the monthly labour force surveys.

28. The reliability of these estimates compared with the census estimates has been found to vary with the size of the population in the LGA/SLA. Given the small size of SLAs in the ACT, these unemployment estimates should be treated with extreme caution. DEET advises that,

wherever possible, it is preferable to use the estimates for the aggregated ACT regions, namely Canberra Central, Belconnen, Woden Valley, Weston Creek, Tuggeranong and Outer Canberra.

29. Motor Vehicle Census. Presents statistics relating to vehicles which were 'on register' at 30 September, 1993 with a motor vehicle registration authority.

30. The statistics include vehicles with diplomatic and consular plates and State and Commonwealth Government owned vehicles other than those belonging to the defence services. It should be noted that vehicles such as tractors (particularly the agricultural types), plant and equipment and motor vehicles used solely on farms, in mines, etc. and not used on public roads are not required to be registered in some states and are, therefore, excluded from the statistics.

31. Passenger vehicles. Vehicles constructed primarily for the carriage of less than 10 passengers (including the driver). Includes cars, station wagons, 4WD passenger vehicles and forward control passenger vehicles.

32. Light commercial vehicles. Vehicles constructed primarily for the carriage of goods and not exceeding 3.5 tonnes gross vehicle mass (GVM). Includes utilities, panel vans, cab chassis' and forward control load carrying vehicles (whether 4WD or not).

33. Trucks. Includes rigid, articulated and non-freight carrying. Rigid trucks are constructed primarily for load carrying with a GVM of 3.5 tonnes or more. Articulated trucks consist of a prime mover having no significant load carrying area but with a turn table device which can be linked to a trailer with a GVM of 3.5 tonnes or more. Non-freight carrying trucks include specialist vehicles with no goods carrying capacity such as ambulances or mobile cranes.

34. Buses. All passenger vehicles having more than nine seats, including the driver.

35. Retail Statistics. The statistics were obtained from the Retail Census conducted by the ABS in respect of 1991-1992. The information shown in the retail table relates to establishments which operated at any time during the year unless otherwise stated. A detailed analysis of retail statistics by suburb can be obtained from the *1991 Canberra Statistical Area Summary* (Catalogue no. 1313.8).

36. Establishments at 30 June. The number of retail establishments in operation at 30 June 1992. It does not include the number of separately located administrative offices and ancillary units.

37. Persons employed at 30 June. Employees plus proprietors and partners working on a full or part-time basis, including those working at separately located administrative offices and ancillary units. Unpaid helpers are excluded. Persons working 'full time' and those working less than 35 hours per week are classified as 'other'.

38. Wages and salaries. Gross earnings of all employees, before taxation and other deductions. Earnings of employees working at separately located administrative offices and ancillary units are included. Drawings of working proprietors and partners of unincorporated enterprises are excluded. Working proprietors of incorporated enterprises are considered to be employees.

39. Turnover. Sales of goods (retail and wholesale) and all other operating revenue from outside the enterprise.

40. Road Traffic Accidents. Contains statistics of road traffic accidents which were reported to the police or other relevant authority in the ACT which meet the following conditions:

(a) That the accident resulted in-

- (i) the death of any person within a period of 30 days of the accident; or
- (ii) personal injury to the extent that the injured person was admitted to hospital (particulars of injured persons who receive outpatient treatment at a hospital or who are detained in casualty for observation are excluded).

(b) That the accident involved one or more road vehicles, which at the time of the accident were in motion, including motor cars, station wagons, utilities, panel vans, motor cycles, trucks, buses, pedal cycles (excluding tricycles normally used on footpaths), and ridden animals.

41. Where the accident occurred on an intersection with a number of suburbs the statistics have been allocated to the lowest alphabetical suburb.

42. Schools. The data for government and non-government schools contained in this publication were collected by the ACT Department of Education and Training.

43. A *school* is an establishment whose major activity is the provision of full-time day primary, secondary, college and/or special education.

44. *Government schools* are operated by the Department of Education and the Arts.

45. *Non-Government schools* are operated by non-government organisations that have been certified as 'efficient' by the ACT Minister for Education.

46. Schools have been classified into:

- Pre-school: commences at the age of 4 (as of 1st April) and lasts one year;
- Primary school: consisting of kindergarten to year 6, generally for children aged between 5 and 11;

- High school: consisting of year 7 to year 10, generally for children aged between 12 and 15;
- College: consisting of year 11 to year 12, generally for students aged between 16 and 17; and
- Special school: providing education for children with special needs, for example, schools for the physically or intellectually handicapped, or emotionally disturbed children.

47. A *student* is a person enrolled or registered and active in a course of study at a school. All students, except those in special schools, have been classified by level of schooling (e.g. primary).

48. The *school* statistics by Statistical Local Areas are the location of the schools in the individual suburbs of the ACT.

49. *Home Suburbs Counts* are the number of students residing in each statistical local area who are attending school in the Australian Capital Territory.

50. **Vital Statistics.** *Births and Deaths* relate to all registrations of such events which occurred within Australia, irrespective of State of registration, where the usual residence was within the ACT. Births are allocated to a statistical local area of the territory according to the usual residence of the mother, and deaths are allocated according to the usual residence of the deceased (infant deaths are generally assigned to the usual residence of the mother).

RELATED PUBLICATIONS

51. This publication contains a selection of statistical series presented in related ABS publications together with some data supplied by the ACT Government Service.

52. Users may also wish to refer to other ABS products which give data on a small area level. These products are listed in the back of this publication. All current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). A *Publications Advice* (1105.0) is issued on Tuesdays and Fridays which lists publications to be released in the next few days. These publications are available from any ABS office.

INFORMATION SERVICES

53. The ABS offers a variety of consultancy and information services which, in addition to its many printed and electronic publications and products, provide information and advice on a wide range of statistical needs. The consultancy services operates on a fee for service basis.

54. ABS publications are available for reference from the library in the Belconnen Office of the ABS and through libraries that participate in the ABS Library Extension

Program (LEP). Readers are requested to contact a library participating in the LEP in the first instance.

The following ACT libraries hold all ABS publications:
Australian National Library (Parkes); and
Australian National University - Menzies Library (Acton).

The following ACT libraries hold a selection of ABS publications:

University of Canberra Library (Bruce);
ACT Library Service - main holdings at Civic and Belconnen branches;
Australian Defence Force Academy Library (Campbell); and
TAFE libraries (located at all TAFE campuses - main holding at Reid Campus).

55. Catalogues of ABS publications are available on request.

56. The ABS also has a publications mailing service. Readers may subscribe to ABS publications and arrange to receive them on a regular basis.

57. In some cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms:

microfiche;
photocopy;
data type;
floppy disk;
computer printout; and
clerically extracted tabulation.

Generally, a charge is made for providing unpublished information.

For more information ...

The ABS publishes a wide range of statistics and other information on Australia's economic and social conditions. Details of what is available in various publications and other products can be found in the *ABS Catalogue of Publications and Products* available at all ABS Offices (see below for contact details).

Information Consultancy Service

Information tailored to special needs of clients can be obtained from the Information Consultancy Service available at ABS Offices (see Information Inquiries below for contact details).

National Dial-a-Statistic Line

0055 86 400

(Steadycam P/L premium rate 25c/21.4 secs.)

This number gives 24-hour access, 365 days a year for a range of statistics.

Electronic Data Services

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS Office (see below).

Bookshops and Subscriptions

There are over 400 titles of various publications available from ABS bookshops in all ABS Offices (see below Bookshop Sales for contact details). The ABS also provides a subscription service through which nominated publications are provided by mail on a regular basis at no additional cost (telephone Publications Subscription Service toll free on 008 02 0608 Australia wide).
